Right front door edge guards

Left front door edge guards

Right rear door edge guard

Left rear door edge guard

Seam sealant cutting tool

TOOLS AND SUPPLIES REQUIRED

- Rubber mallet
- Felt-tip pen
- Touch-up paint

INSTALLATION

Customer Information: The information in this instruction is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely add equipment to your car. These procedures should not be attempted by "do-it-yourselfers."

NOTE: This instruction shows the right door edge guards being installed. The same procedure applies to installing the left door edge guards.

- Clean and wax the area to be covered with a high-quality paste wax.
- Identify each door edge guard by holding it up to the door and matching its contour with the door edge.

Installing the Front Door Edge Guards

- Position each door edge guard against the inside edge of the door using the bends for reference. Mark the sealant at the top and bottom ending points of each door edge guard.

- Position the cutting edge of the seam sealant cutting tool against the door edge, and trim the seam sealant from mark to mark, top and bottom.

NOTE: The cutting tool only cuts in one direction. Move it upward on the right side of the car and downward on the left side.

- Apply touch-up paint to the door, and let it dry.

- Position the door edge guards on the door edge, and tap them into position with a series of light taps using a rubber mallet.

- Repeat steps 3 thru 6 to install the left door edge guards.

Installing the Rear Door Edge Guards

- Repeat steps 3 thru 7 to install both rear door edge guards. Start tapping at the wheelwell bend.
