**SUPPLIES REQUIRED**

- Isopropyl alcohol
- Shop towel
- Masking tape

**INSTALLATION**

**NOTE:**
- Be careful not to damage the body paint finish.
- This interior trim kit should be installed only if the outside air temperature is 60°F (15°C) or above.
1. Using isopropyl alcohol on a shop towel, thoroughly clean the areas where the interior trims will attach.

2. Attach a strip of masking tape to the end of each outer adhesive backing, and remove about 2 to 3 cm (1/2 to 1 in.) of the adhesive backing. Fold the ends back, and tape them to the front of the trims. Remove and discard the inner adhesive backings.

3. Position the interior trims on the existing panels. While applying light pressure to the inner panels, carefully remove the adhesive backings from the interior trims.
   - Before installing the switch trim, check that the hole in the panel is aligned with the switch hole properly.
   - Install the outlet trim so that the line drawn across the top and bottom recesses is vertical with the chipped end facing down.

4. After installing the trims use the palm of your hand to hold pressure against them for 30 seconds.

Left Switch Trim: (EX model only)

Right Switch Trim: (EX model only)

Right and Left Air Outlet Trims:
Center Trim:

USE AND CARE

Use a sponge or soft cloth dampened with mild detergent and water solution. After cleaning, wipe with a clean, soft cloth. Do not use cleaners or polishers containing compounds to clean the interior trims as they may damage the surface.

Meter Trim:

OUTER ADHESIVE BACKING
Remove 2 to 3 cm (1/2 to 1 in.) from the end, and tape it to the front of the trim.

CENTER TRIM

OUTER ADHESIVE BACKING
Remove 2 to 3 cm (1/2 to 1 in.) from the end, and tape it to the front of the trim.
